

How To Make a Stroller Fruit Salad

Materials

- 1 Watermelon
- 1 Orange
- 1 Cantaloupe
- 1 Cluster of Grapes
- 1 Lime
- 1 Cup of Raspberries
- 1 Pacifier
- Box of Toothpicks
- 2 Large Rubber Bands
- Spoon
- Sharp Knife
- Melon Baller
- Assorted Fruits

Instructions

1. Take your watermelon and cut a thin slice off the bottom so it remains stable on your platter or serving tray.
2. Wrap a rubber band around the length of the watermelon. Then wrap a second around the width of the watermelon, slightly off-center.
3. Starting at the intersection of the two rubber bands, make horizontal cuts around the watermelon using your knife. Follow the rubber band and do the same along the vertical rubber band.
4. Remove the quarter of the watermelon that was just cut.
5. Scoop out the watermelon with a melon baller to fill the stroller later.
6. Take an orange and a lime and slice them into 4 orange slices and 4 lime slices. Stack one orange slice and one lime slice on top of one another and pierce with a toothpick. Repeat until you have four wheels.
7. Attach the wheels to the watermelon carriage and cap off each wheel with a raspberry.
8. Next, peel the cantaloupe and cut it in half to use as the baby's head.
9. Cut the grapes in half for the baby's eyes and a watermelon ball for the nose.
10. Using toothpicks, attach the grapes and watermelon melon, for eyes and the baby's nose.
11. Cut a triangle in the cantaloupe half where the baby's mouth should be. Fix the pacifier in this triangle.
12. Fill the watermelon carriage with the rest of the fruit.
13. Place the cantaloupe baby head inside the stroller.
14. Display the watermelon stroller on a platter with fruit surrounding the bottom.
